Letter of Recommendation

Dear Carolyn,

I am happy to provide you with this letter recommending the services of Miller Survey Group. To date Miller Survey has supported all site development survey services for joint commission resolution to re-plat, develop metes and bounds for water line easement abandonment and rededication, and develop metes and bounds of internal road ways for CoH GEM submittal, of the 35 acre BCM McNair campus located at Old Spanish Trail and Cambridge. All work has been completed in a professional, timely manner to support construction permitting and construction execution for the new Baylor College of Medicine Clinic and Hospital. Miller survey teams working on the site have successfully completed the site safety orientation and have no reported safety incidents to date. All of this has contributed to making this a very successful partnership between Miller Survey and Baylor College of Medicine.

Sincerely,

*Steve M. Womack*
