To Whom It May Concern:

As the President of Slack & Co. Contracting, Inc., I work closely with many specialty contractors and professional service providers in the Houston area. This allows me the opportunity to identify the firms that possess the expertise, integrity, and professionalism that is needed to support our very dynamic civil contracting business.

It gives me great pleasure to write this letter to recommend the Miller Survey Group. Slack & Co. Contracting, Inc. has used Miller Survey Group for our field engineering services for several years. Most recently we worked with them on the following projects: The University of Houston, Cullen Campus; Houston Community College – Sienna Campus; Rice University – McMurty Housing; and University of Houston - Sugarland Campus. Our personal experience with Miller Survey Group has been beyond satisfactory; in fact it has been exceptional. In every single instance, their service was exemplary, their staff professional, and their attention to detail amazing. These projects where we utilized their services resulted in a successful project for us but most of all resulted in the client being able to open each of their facilities in a timely fashion.

It is without reservation that I endorse the products and services of Miller Survey Group. It is a pleasure to work with them, and I feel confident our partnership will continue well into the future.

Sincerely,

Jim Slack, Jr.
President
